2005 November/December Holiday Programme

Activity-based Science Enrichment Workshops (Primary 3,4 & 5 syllabus)

These 5-session workshops aim to provide a comprehensive review of all main topics covered in Primary 3, 4 and 5. We conduct hands-on experiments to help students understand abstract scientific concepts better. Each lesson aims to review a particular topic, with detailed and well-compiled notes to help students reinforce and consolidate scientific knowledge. Our lessons emphasize on conceptual understanding and process skill answering techniques.

This advanced-revision workshop is recommended for new pupils and also those who need additional guidance at answering open-ended style questions. Also suitable for pupils who have not scored well in their school Science Examinations and would like to revise previous concepts more thoroughly before moving on to the next level.
